Kadıkoy**

I have been actively working in the petroleum market and recently under the roof of mineral oil (lube oil)group since 2005. I have completed my Micro MBA education in Galatasaray University on the first degree. Also working on the subjects regarding purchasing, quality management, production, R&D, accrediting laboratories, creating OEM and TSE product groups, finance and accounting, collateral solutions and sales channels by addressing to State Tenders/B2B/B2C/Large Customer groups in order to improve and invest on myself. I have really real experience on these subjects. I am defined by following-up, discovering and researching into novelties, with the desire to develop the company. I also take pride in being sensitive towards the corporate structure, to being successful at undertaking responsibilities and initiatives.
